Chennai, India — dhriti.vaz@gmail.com — +91-9884162325 — github.com/DhritiVaz — linkedin.com/in/dhritivaz

Education

Vellore Institute of Technology (VIT), Chennai

2024 – 2028

B.Tech in Computer Science Engineering

CGPA: 8.12/10

Technical Skills

Languages: C, C++, Java, Python, JavaScript

Web Technologies: HTML, CSS, React.js, Node.js, Express.js, Flask

Databases: PostgreSQL, SQLAlchemy, Prisma ORM

Tools & Platforms: Git, VS Code, Render

Experience

Billing System Developer Intern

Mar 2025 – Jul 2025

GeoPacific Solutions, Chennai

- Contributed to a billing and payment tracking system as part of a collaborative development team.
- Assisted in backend development using Node.js and PostgreSQL for data management and storage.
- Participated in designing flexible data structures to support multiple product types in billing workflows.

Projects

Expense Tracker

[Live](#) — [GitHub](#)

Python, Flask, PostgreSQL, SQLAlchemy, JavaScript, Chart.js, HTML/CSS, Render

- Built a full-stack multi-user expense tracker with secure login, deployed live on Render with PostgreSQL.
- Implemented natural language input parsing phrases like "lunch 80 today" into structured database entries.
- Engineered a smart savings planner that analyses spending patterns and recommends category-level cuts to reach goals.
- Designed an insights engine with personality profiles, streak tracking, and weekday vs. weekend breakdowns.
- Integrated Chart.js for interactive doughnut and bar charts across a 4-tab dashboard (Overview, Expenses, Budget, Reports).

Student Dashboard & Management System

React.js, Node.js, Express.js, PostgreSQL, Prisma ORM, CSS, Git

- Built a full-stack student dashboard with admin authentication, RESTful APIs, and a modular React frontend.
- Converted static HTML layouts into a dynamic single-page application with routing and reusable components.
- Developed Express.js backend with RESTful endpoints and managed schema design and migrations via Prisma ORM.
- Handled full-stack integration including database debugging, form validation, and frontend-backend data flow.

Centralized Billing & Inventory System

Node.js, PostgreSQL

- Developed a backend system for billing operations and inventory tracking with PostgreSQL data storage.
- Designed workflows for invoice generation and product management; focused on backend architecture fundamentals.

Interests

Full-Stack Development, Debugging & Problem Solving, UI/UX Design, Physics
